

Battleship Math

A 2-player times-tables battle game

How to Play

- 1 You and your opponent each get your own page. Don't peek at each other's grids — fold along the dashed line so your Question Key and Ship Grid are hidden.
- 2 On your Ship Grid, draw 4 ships: two size 2, one size 3, one size 4. Ships can be placed horizontally or vertically, but can't overlap.
- 3 Take turns calling out a coordinate, like "B4."
- 4 Your opponent checks their own Ship Grid at that coordinate. No ship there? They say "Miss!" and your turn ends.
- 5 Ship there? They say "Target acquired! To fire, answer the following: what is 9×7 ?" — reading the question from their own Question Key at that coordinate.
- 6 Answer correctly → Hit! Mark it on the Ship Grid. Answer wrong → Miss! Either way, it's the next player's turn.
- 7 First player to sink all of the opponent's ships wins!

HIT — answered correctly

MISS — no ship, or wrong answer

Player 1 of 2

QUESTION KEY — Keep Hidden!

	A	B	C	D	E	F
1	13×11 = 143	13×1 = 13	4×6 = 24	4×11 = 44	13×5 = 65	4×2 = 8
2	4×7 = 28	13×8 = 104	4×1 = 4	8×1 = 8	8×9 = 72	8×8 = 64
3	13×4 = 52	8×12 = 96	8×4 = 32	8×2 = 16	8×6 = 48	4×5 = 20
4	13×10 = 130	4×3 = 12	8×5 = 40	8×7 = 56	13×2 = 26	8×3 = 24
5	8×10 = 80	4×4 = 16	8×11 = 88	13×7 = 91	13×12 = 156	4×10 = 40
6	13×3 = 39	4×9 = 36	4×8 = 32	4×12 = 48	13×6 = 78	13×9 = 117
